Laser
GRAND PRIX
T.M.
Packs the power to blow the
doors off the competition!
TAITO

Laser GR

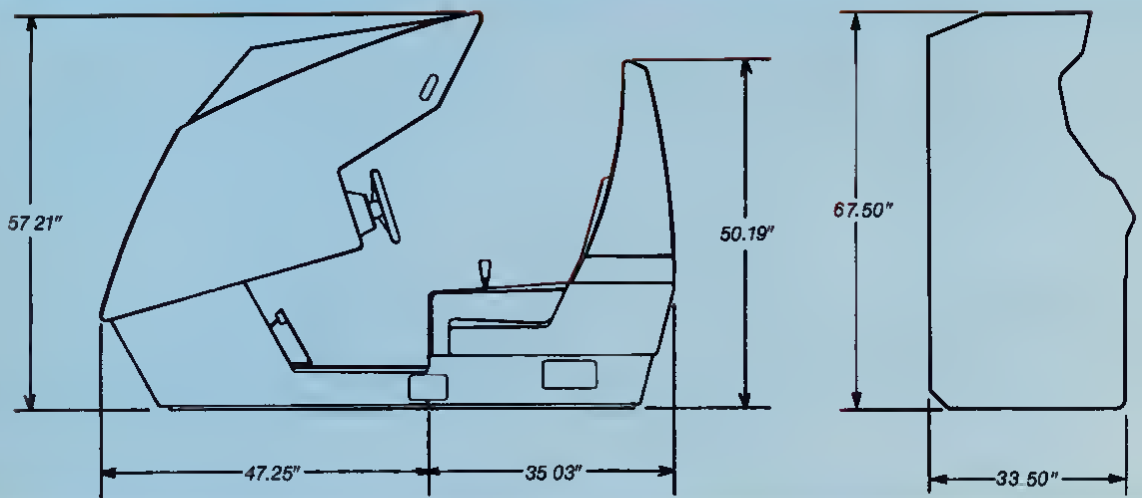
ND PRIX™

Out-passes everything!

LASER GRAND PRIX is Formula-1 racing the way only laser technology could bring it to you ...with film footage photographed from an actual car race driven by professionals! Sleek racing cars, a fast track and sensational special effects all come together to really put the player in the driver's seat! The fantastic new cockpit is fully loaded with compact steering wheel, accelerator, brake and new transmission system that powers the car from neutral through low and high gears. In upright or cockpit, LASER GRAND PRIX is hi-performance and incredible power like never before!

The player must first qualify for position by opening it up and zooming down a 400 meter straight-away in the time trials of the preliminary Drag Race. Then it's on to racing's big event... the Grand Prix! The player has 70 seconds to navigate hair-pin curves, down-shift, brake, ease into bends and accelerate out, leaving the competition in the dust! Throughout all the heats, the player must avoid collisions, spinning rear tires and engine backfire that all use up precious time as he is judged according to both the quality of his driving and speed.

Laser GRAND PRIX™



available in cockpit and upright

If it can do 400km/h in a race, imagine what it can do in your location!
